## DETAILED ACTION

### Claim Rejections - 35 USC § 102

- The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

- *Claims 15-16 are rejected under 35 U.S.C. 102(e) as being anticipated by DE HAAN et al. (USPAP 2002/0025077 A1).*

Regarding claim 15, DE HAAN et al., recite determining, by a decoder, whether to perform motion compensation on motion vector decoded data or not depending on a value of a decoded motion vector and generating a decoded image based on a result of the determining to perform the motion compensation (Please note, figures 3-4 in correlation to paragraphs 0058-0059. As indicated the decoder comprises its own motion vector estimator ME2 which calculates motion vectors in dependence on the output signal of the decoder and a delayed version of that output signal supplied by a frame delay FM. The switch 19 applies the motion vectors from the variable length decoder VLC-1 or the motion vectors from motion estimator ME2 to the motion compensation unit MC. The switch 19 is controlled by the control signal I/P delayed over a frame delay by means of a delay unit).

Regarding claim 16, it recites the same elements of claim 15 with addition of MPEG. In this regard, please note figures 3-4 and paragraphs 0063-0064.

## Examiner's Note

- The referenced citations made in the rejection(s) above are intended to exemplify areas in the prior art document(s) in which the Examiner believed are the most relevant to the claimed subject matter.
- However, it is incumbent upon the Applicant to analyze the Prior Art document(s) in its/their entirety since other areas of the document(s) may be relied upon at a later time to substantiate Examiner's rationale of record.
- A Prior Art reference must be considered in its entirety, i.e., as a whole, including portions that would lead away from the claimed invention. W.L. Gore & associates, Inc. v. Garlock, Inc., 721 F.2d 1540, 220 USPQ 303 (Fed. Cir. 1983), cert. denied, 469 U.S. 851 (1984). However, "the Prior Art's mere disclosure of more than one alternative does not constitute a teaching away from any of these alternatives because such disclosure does not criticize, discredit, or otherwise discourage the solution claimed ...." In re Fulton, 391 F.3d 1195, 1201, 73 USPQ2d 1141, 1146 (Fed. Cir. 2004).
